REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest patent prior art the examiner found is Peter (Pub. No.: US 2005/0177485). While Peter briefly mentions about probability density function and calculating functions, it does not calculate interest rate in the same way as described in the present claims. Furthermore, Peter fails to utilize trim function in calculation and to disclose the function of B as recited in the present claims. In addition, the previously cited references, namely UNA, Ronald, and Texas Instruments, fail to disclose every limitation of the present claims as amended, whether taken alone or in combination.

Specifically, all the cited prior arts fail to teach: a Processor configured to process quantity of money K, extra yield M, additional amount of money L, and eventual taxes to be calculated λ , into a function $B(K, M, L, \lambda)$ set by the user and representative of a quantity of money that, asked of the borrower, allows the lender to obtain an average return of $(K+M)$, said function $B(K, M, L, \lambda)$ being defined as follows:

$B(K, M, L, \lambda) = \alpha K + L(1 - \lambda) + M(1 - \lambda)$ wherein α represents the percentage of capital reimbursed in the time period considered, said Processor being configured to determine an interest for entrustment of said quantity of money K as a function of said quantity of money K, extra yield M and additional amount of money L, said Processor being configured to process said quantity of money K, said taxes A, and said function B according to a trim function $T(x; b, K, B, \gamma)$ weighted with a probability density function $(f(x))$ of a cash flow of the borrower, said trim function $T(x; b, K, B, \gamma)$ having four intervals: less than the minimum recoupment of money b, equal to or greater than b and less than

K, equal to or greater than K and less than B, equal to or greater than B, wherein said trim function $T(x;b,K,B,\gamma)$ gives the following results:

- if x is less than b , the result is b
- if x is equal to or greater than b and less than K , the result is x
- if x is equal to or greater than K and less than B , K is subtracted from x , and the result is multiplied by $(1 - \lambda)$, and K is added to the result
- if x is equal to or greater than B , K is subtracted from B , the result is multiplied by $(1 - \lambda)$, and K is added to the result. These allowable features are in all the present claims, namely claims 20-22, 24-26, 29-37, and 40.

In addition, all the previous rejections based on U.S.C. 101 and 112 have been addressed. Therefore, the present application is in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
